

# WEBiNAR

## INSTRUCTORS:

Audrey Hemlinger  
Brian Chambers

Audrey is an Ergonomist with the Division of Safety & Hygiene, Ohio Bureau of Workers' Compensation. She has been with Ohio BWC for 5 years. She holds a Bachelor of Science degree in Environmental Health and Safety from Bowling Green State University, and a Master of Science degree in Occupational Health from the University of Toledo. She also holds a Certified Safety Professional (CSP) Designation.

Brian Chambers has been a consultant with BWC since 1994. He has worked with varied industries to identify ergonomic risk factors and work through solutions that eliminate and reduce the exposures to injuries. He has teamed up with hospitals and nursing homes to identify equipment gaps to develop long-term plans to eliminate dangerous manual patient transfers.

## Safe Patient Handling: Is Your Facility Following the Guidelines?

11:00 a.m. -12:00 p.m.  
7.14.2020

Transferring and repositioning people in care facilities make long-term health related care one of the most dangerous jobs in the country. Has your facility eliminated manual transfers – if not, you may have higher operating costs while exposing your staff to severe injuries? High turnover, above average workers' comp rates, and overtime all can be a result of unsafe manual transfers. Additionally, your quality of care can suffer as manual transfers can result in more skin tears, falls, and broken bones to your patients and residents.
